

Very disturbing

11.30.2011

Dear SETI,

This is getting worse. I am writing down these conversations that I hear telepathically in my mind between myself, a Grey, my hybrid son, and a Reptilian. Why do I even bother to write it down? Isn't it just obviously not true? I'm afraid it's not that simple. I have evidence that the ETs are real. I can go into that later. And I am a physics and chemistry student with straight A's, so I know what evidence means. I do not have formal evidence that I could pull out for everyone, but evidence that is valid for myself and for others who have been there with me.

Yes-No! I did not want to honor it! Do you have onions? – Hamish
Are you hungry? – Hamish asks the Dragon
You do not have a ppy-ppy. – Hamish
You are not me! – Hamish
You do not have children. I do. – Hamish
You do not have a penis. – Hamish

The content of our discussions is becoming very disturbing. Here's a recap. Reptilians have seized control over other ET people: the Greys, the Orions, and the Draconian Dinosaurs. The Greys, Dinosaurs and Orions are all employed working directly hands-on with human breeding programs. Humans such as myself here on Earth are being harvested for eggs and sperm. Human offspring are made there in their laboratories. They also prepare human-ET hybrids. There are human-Grey hybrids, and there are human-Dinosaur hybrids, but I have not seen any human-Orion nor human-reptilian hybrids so far.

The reptilians are brutal and physically violent. They insist that the other ETs

Does it have children
for me, I said? –

Hamish

Does it have balls? –

Hamish

I mean, have you
looked? – Hamish

Haha, Hamish. I have
not looked! – me

I would like to look there.

*To see if it might have some
eggs. – Hamish*

They even showed me pictures from their home world, which makes them look even more like a sci-fi comic book character. They have beautiful cities with buildings with several floors up. The buildings are all white and rounded in shape. It is impressive and modern looking, but oh so sci-fi-comic-book. It is almost outrageous and silly to meet with the Orions, because it is so cliché. So I couldn't have made it up.

I asked to meet with the Orions. It turns out that if I am to meet with any of the ETs in person, it will happen "in the forest". The Orions said that they would like to meet with me too, if I meet with the reptilians. Orions are very friendly and kind. They were forced into working on these projects, by the reptilians. I don't care what people say about Orions or what rumors might be out there, the Orions, I am sure, are good people.

I *almost* got to meet the Orions last night.

At least I got to see them very clearly and for

a very long time. I am getting closer to close contact.

“I thought it sounded like rubbish”

And either later that evening or early this morning a reptilian was chatting with me again. He told me about how the reptilians want to take over our Earth and enslave all the humans. He said that the "Cabbalas" want world

I've had glimpses about humanoids being kept in vertical watertanks, with all kinds of tubes attached to the creatures. They are conscious. It is horrible. I used to see these things years ago in my first years-long period of ET contacts. Here's one you might like:

I once woke up at night and I was somewhere else. There were the men in black suits - humans - walking with me. I was in a room with lots of vertical tanks with creatures in them. There were thick water tubes running all across the floor and I was having to watch my step not to trip on those. So I've seen it before. And now, after more than a ten year break without conscious contact, all of these ETs are back with me. (Meanwhile the men in black suits - humans - and military, have been here all along ever since then and still. Just a moment ago "Sergeant Wilkes" said hello telepathically.)

“Cover-up, or tell-all?”

I'm thinking of writing a tell-all book about this. What do you think? Should the public know? Or is it my obligation

I will bite him. – Hamish
What does he want? – Hamish
He wants blood. – Hamish
I want to know, what does he want. – Hamish
He wants to eat a baby. – Hamish
He wants to eat blood. – Hamish
That was a good picture. It is dominant. – Hamish
It eats blood. – Hamish
It is my picture! – Hamish
If it does not eat or bite me. – Hamish
I want to give it blood! – Hamish
Those are my lunches. – Hamish
There isn't enough for him. – Hamish
I will hit him! – Hamish
I don't want to fight him. – Hamish

to keep this secret? I don't know what to do. I would appreciate advice. Cover-up, or tell-all? What do you think. This is for definitely real. All of it.

Eva

More about his scales...

1.09.2012

Dear SETI,

More about his falling scales:

The reptilian said that the others (other reptilians) harm him when they see that his scales are falling off. And they tell him that he should not look that way. Sad, huh?

Eva

Are you hungry? Do you have a home? – Hamish
You cannot take my home. – Hamish
My eggs are there. – Hamish
My snacks are there. – Hamish

Ahh, my red reptile. He is a large build with broad shoulders, covered in red reptilian scales. He has yellow eyes with a brown vertical slit. When he creeps up real close to me, I can almost see as if his body were on top of mine. Sometimes I can hear the hissing sound when he exhales, and on a rare occasion I sense the repulsive smell of sulfur and pestilence in his hot breath.

“He calls it, "feeling the power"”

He calls it, "feeling the power". I call it sex. Best of all, I think that he is enjoying it too. I think that he actually comes up close to me and somehow engages the nervous system of my body such that he and I together have a pleasurable experience. Think of it like a dog humping on a human's leg. Animals do it without reservations. Only we humans seem to try to restrict the sensory pleasures we seek. Only a human feels embarrassed about seeking out a good feeling. Only a human would have taboo and guilt and shame onto this. The reptilian enjoys it without inhibitions, he doesn't have as much as an ounce of humiliation. And, since it's not my choice when he "humps" me, I can just go ahead and enjoy it too.

What is that? – Hamish
Does it want to challenge me? – Hamish
No. It cannot have my eggs. – Hamish

I found a video online where a guy talks about how other women too have described having sex with reptilians. Here is the first out of four videos:

Reference # 4 Video Understanding The Reptilian Mind

their body parts as if they didn't care. I even lost a best friend when I argued for the well-being of chickens and he didn't want to care about "food on the plate". Reptilians are carnivores, and I bet you livers and kidneys taste good to them. Humans are quick to judge, but humans are even meaner to food animals.

I am personally almost vegan. Actually, knowing the hybrids and some of the fates they go through makes me even more vegan. Next time you enjoy some eggs or a nice steak, think about the animals and what they went through. Before you decide whether to pass judgement on the eating habits of our Honored Reptile Royals.

Mm. A goody bag. SETI should keep some candy bags of liver and kidneys by the entrance to welcome any reptilian visitors. Yumm tasty treats! (Sarcasm of course. I would not eat it and I don't even eat dairy or meat.)

Eva

It was my Dragon. – Hamish
It was mine. – Hamish
Do you have blood in you that smells? – Hamish
Answer! I asked! – Hamish
Is it blood? – Hamish
“There is blood in my gape”, he says. – Hamish

This has been a preview of Dragon Clip Art
pages from the book
The Orion Project: Letters to SETI 2
by Eva Draconis

find the book and more through our website
